Please install the following packages before session 2

Snscrape from https://github.com/JustAnotherArchivist/snscrape

First, please activate your conda environment. Then:

You may install the stable version via

```
python -m pip install snscrape
```

Or from the development version

```
python -m pip install git+https://github.com/JustAnotherArchivist/snscrape.git
```

Then beautiful soup should also be installed via:

```
conda install -c conda-forge bs4
```
